The paccher

An easy algorithm to assign elements to a minimum number of beds inside of stacks!

The team

Eugenio Berretta

Claudio Vigliarolo

Jaime Venturini
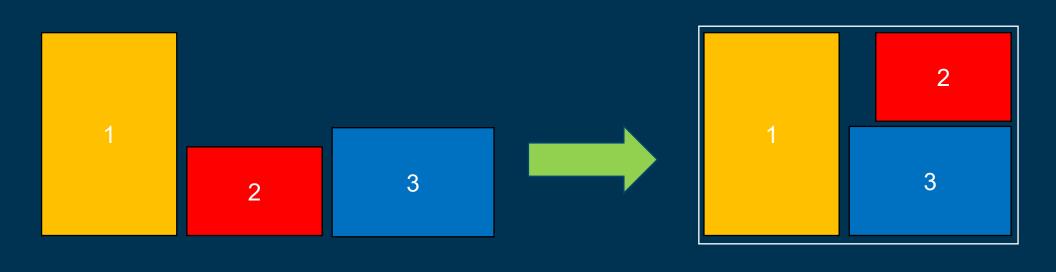

Luka Kazic

The problem

"Develop an algorithm, that assigns a set of elements (rectangles) to a minimal number of beds"

- Elements have a rectangle shape and are in different sizes, concrete quality and stacks
- Beds have a rectangle shape and are in predefined dimensions

The solution

Time and resources
efficiency goal

Two different modules
