Which game?!

Desicion

Which game are we going to play?
Gruber Logistics or Infominds?

How

How will we approach the game?

Who

Who will take on which role?

WHY?

Because we thought we'll have more time to drink some beers at 144p
but it really proved otherwise ;)

Technology

DB

The Windows Server efficiently processes the data, forwarding it all the way to the database.

Windows Server

The Arduino transmits the data to our Windows Server (initially Raspberry Pi).

Sensors

Sensors establish communication through i2c (or WiFi) with our Arduino.

Gathering

The website compiles the data from our database using PHP.

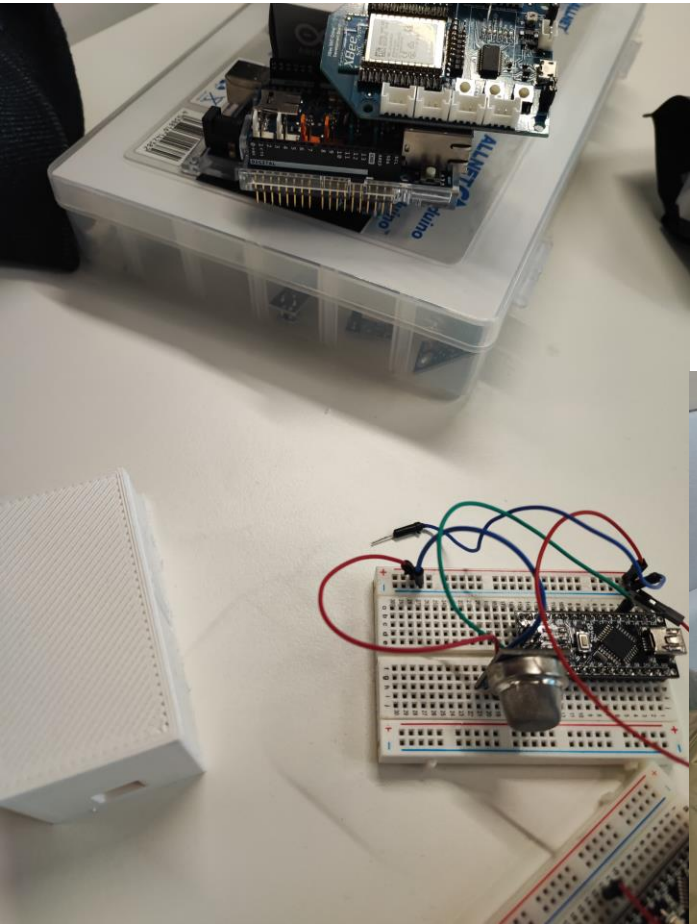
Website

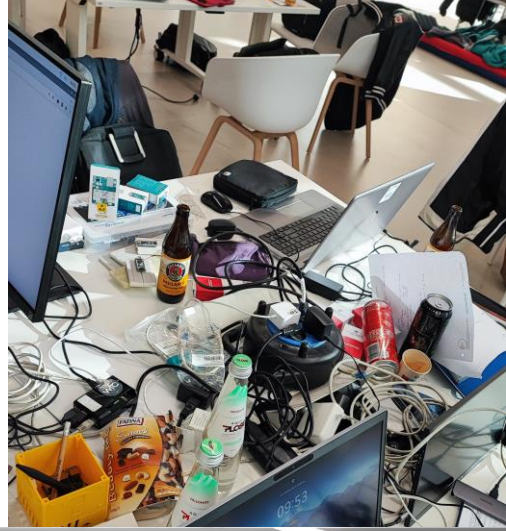
Users can view real-time data on the website through an intuitive UI.

Admin

Administrators are able to edit and introduce new data.

Some impressions





Thanks for those sleepless but nice 24 hours!
