The problem

Imagine you would like to find a truck near the area...

The problem

... so that you have to call third-party express trucks ...

The problem

... and you are tired to infinitely call **SO SO SO SO SO SO** many companies ...

Use cases

Easy management of **communication** between operator and supplier

Automatic **negotiations** of shipment costs
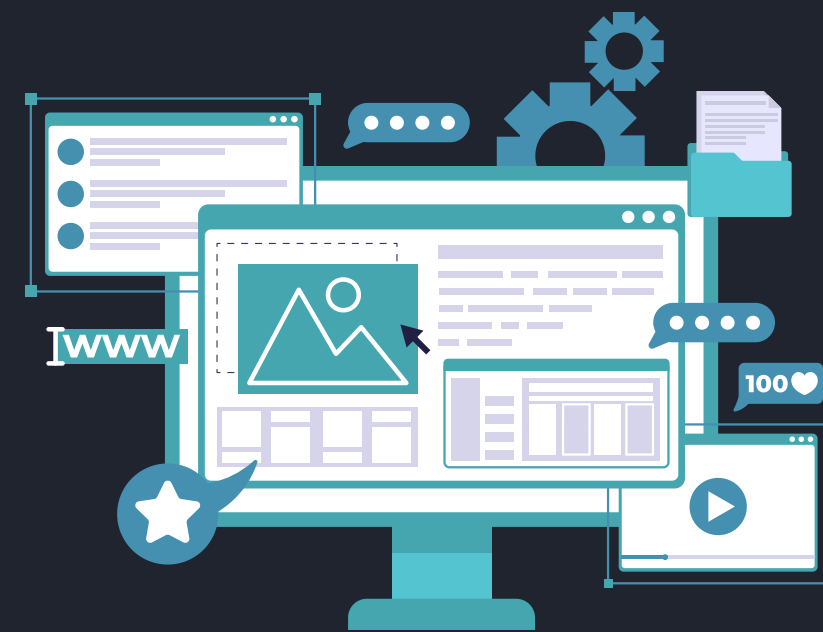

Technologies

Frontend:
React

Backend:
Flask

API:
LangChain
Claude 3

LET'S SEE THE CODE TALKING... WHO NEEDS SLIDES!

Thanks!
